

# Marking Documentation

1. Select course to mark

## Cameron's Test Moodle Site

The screenshot shows the Moodle interface for 'Cameron's Test Moodle Site'. On the left, there are two sidebars: 'NAVIGATION' with links to Home, My home, Site pages, My profile, and My courses; and 'ADMINISTRATION' with a link to My profile settings. The main content area is titled 'Available courses'. It lists two courses: 'Testing Documentation' and 'Ophthalmology 101'. The 'Ophthalmology 101' course is circled in red. Below the course name, it shows the teachers 'Hubert Johnson' and 'Mark Marker', and a description: 'Ophthalmology is the branch of medicine that deals with the anatomy, physiology and diseases of the eye.'

2. Select exam to mark

## Ophthalmology 101

The screenshot shows the Moodle interface for the 'Ophthalmology 101' course. At the top, there is a breadcrumb trail: Home > My courses > Miscellaneous > Ophthalmology. On the right, there is a 'Turn editing on' button. The left sidebar shows the 'NAVIGATION' menu with links to Home, My home, Site pages, My profile, and Current course. Under 'Current course', the 'Ophthalmology' section is expanded, showing links to Participants, Badges, General, 27 August - 2 September, and 3 September - 9 September. The main content area shows a list of activities: 'News forum', 'Ophthalmology Final Exam' (circled in red), 'Test Quiz', and 'Test'. On the right, there is a 'SEARCH FORUMS' section with a search box and a 'Go' button. Below that is a 'LATEST NEWS' section with a link to 'Add a new topic...' and a message: '(No news has been posted yet)'.

3. Click "Attempts"

## Ophthalmology 101

Quiz	Ophthalmology Final Exam
Question	Q1
Completed on	Sunday, 12 October 2014, 6:19 pm

### Question 1

Complete

Marked out of 1.00

A 50 year old gentleman is referred to you for consideration of right cataract surgery. He gives a history of blunt trauma to that eye but has no evidence of any ocular sequelae other than the cataract. He has no phacodonesis.

At surgery, with maximal preoperative dilation, you note that the lens is subluxed inferotemporally with 90 degrees of zonular dialysis superonasally but no vitreous prolapse.

Outline in a stepwise fashion how you would modify your surgical approach in such a case.
